

WEEK ST MARY WEBSITE

2005 - 2023

Annual Report 2023

Now in its 18th year, the hosting of the domain (weekstmaryvillage.co.uk) has been upgraded by adding a SSL (Secure Socket Layer) Certificate to the domain. This means that viewing the website adds a 'padlock' to the viewing experience, just as it would when viewing the majority of web domains, especially those involving financial or personal information.

There was a second reason for adding the SSL Certificate – Some browsers offer the option of heightening the level of security when searching for websites by excluding those sites without SSL Certification. So now, our website has the prefix 'https' instead of the standard 'http' and can be viewed by all.

e.g. <https://www.weekstmaryvillage.co.uk>

As in previous years, there has been continual interest in the following pages:

Over 5,000 people had browsing sessions of between 16 and 30 minutes.

sitemap.html	with	2,584 hits
villageshop.html	with	2,413 hits
parishcouncil/	with	2,278 hits
calendar.html	with	2,088 hits
magazine.html	with	1,826 hits
quicklinks.html	with	1,710 hits
shophours.html	with	1,626 hits

Total.....16,300

The website as a whole has seen nearly 288,000 hits during the previous 12 months – that equates to about 790 hits per day. I have often been approached by visitors explaining that they found relevant information of interest on the Week St. Mary Village website.

As always, we wish to publicly thank the Parish Council for their support of the Week St. Mary website.

David Martin & Linda Cobbledick
